- 2002 (13)

The International Development Research Centre (IDRC) is a corporation created by the Parliament of Canada in 1970 to stimulate and support scientific and technical research by developing countries for their own benefit. The fields of investigation supported by IDRC affect — directly and indirectly — the day-to-day lives of people in the developing world. For administrative purposes, these fields of activity are grouped into seven main areas: agriculture, food, and nutrition sciences; health sciences; information sciences; social sciences; earth and engineering sciences; fellowships and awards; and communications.

Library and Bibliographic Services

The goal of IDRC's Library is to stimulate and facilitate access to information about Third World development. In the pursuit of this goal, emphasis is placed particularly on research in adapting scientific and technical knowledge to the economic and social advancement of developing countries.

The Library provides information and library services as well as training and advice to IDRC staff, recipients of IDRC support, and Canadians involved in governmental, academic, and voluntary institutions concerned with Third World development. Training is also offered to the personnel of international organizations who are responsible for establishing information guidelines and standards. As resources permit, the Library also answers requests from institutions in developing countries, international organizations, and institutions in other developed countries. In close collaboration with the Information Sciences Division of IDRC, the Library acts as a "test-bed" for technological and bibliographical developments and standards.

Collections

The Library's collection of books, documents, microforms and serials reflects the interests of IDRC. The areas of technology transfer, information systems, farming-systems research, science policy, health issues in tropical environments, and economic and social development are particularly well represented. The collection is current and includes about 60 000 books and documents and 5 000 serial titles.

Special collections are also kept by the Centre's Library.

- The Brundtland Collection contains background papers, written submissions, tapes and transcripts, and minutes of the World Commission on Environment and Development.
- An archival collection contains IDRC-supported publications, material written by Centre staff, and publications about the Centre and its activities.
- InfoQuest is a collection of files containing current material (annual reports and brochures) describing over 2 500 organizations, research centres, and government departments located in Canada and abroad whose activities relate to IDRC's interests. This special collection also includes country files describing the current political, social, and economic conditions in developing countries.
- A microforms collection includes copies of IDRC publications, documents from the Sahel collection of the University of Michigan, and documents listed in four data bases: DEVSIS, SALUS, UNIDO, and AID.

Access to the Collection

To facilitate access to the collection, the Library uses MINISIS, a software package developed by IDRC. Items are catalogued, classified, and indexed using the *UNISIST Reference Manual for Machine-Readable Bibliographic Descriptions*, the Universal Decimal Classification (UDC), and the *Macrothesaurus for Information Processing in the Field of Economic and Social Development* (New York: United Nations, 1985).

Access to the Library's collection is provided through computer-output-microform (COM) fiche indexes for personal and corporate authors, title and serials title, and serials corporate authors. On-line searches of the Library's data base, BIBLIOL, allows access in various ways, including by subject. The Library also publishes *IDRC acquires*, a monthly listing of what has been added to the collection.

Services

As previously mentioned, the Library serves IDRC staff, recipients of IDRC support, and Canadians involved in Third World development. It also responds to training and information requests from other international organizations.

Reference and research

The Library provides various information and research services.

Document delivery

All items in the Library are available on loan except for reference works, materials in special collections, and periodicals. Copies of microfiche and periodical articles are available. Persons from outside IDRC are asked to make their requests through the interlibrary loan facilities of their own libraries.

Development data bases

To nonprofit organizations, the Library offers access to 11 data bases: 6 are in-house, IDRC data bases; 5 are from other international organizations. This service is provided free to more than 120 organizations around the world. Users must, however, pay telecommunication costs.

- ACRONYM: Acronyms relating to the interests of IDRC.
- BIBLIOL: The collection in the IDRC Library.
- DEVSIS: Development literature published in Canada.
- SALUS: Low-cost rural health care.
- IDRIS: Inter-Agency Development Research Information System — projects of IDRC, International Foundation for Science (IFS), Swedish Agency for Research Cooperation with Developing Countries (SAREC), Board on Science and Technology for International Development (BOSTID), German Appropriate Technology Exchange (GATE), United Nations University (UNU), and Japan International Cooperation Agency (JICA).
- FAO: Documentation data base of the Food and Agriculture Organization of the United Nations.
- ILO: LABORDOC data base of the International Labour Organisation.
- NRG: Energy topics in the Third World.
- UNESCO: Data base of the United Nations Educational, Scientific and Cultural Organisation.
- UNIDO: Industrial Development Abstracts data base of the United Nations Industrial Development Organization.

MEDLARS

The Library serves as the Canadian centre for MEDLARS searches in response to requests from developing countries.

Tours

Guided tours and orientation to the Library's facilities and services are provided upon request to individuals or groups.

Facilities

The Library is open from 9:00 a.m. to 5:00 p.m. Monday to Friday. During this time, the following facilities are available:

- A photocopier for duplicating library materials; there is a charge for this service;
- Microfiche/microfilm readers and printers; there is a charge for copying microfiche into print;
- Study carrels for research and study.

For More Information

For more information on the Library and bibliographic services offered at IDRC, please write, telephone, or visit the Head Office at 250 Albert Street in Ottawa, Canada.
